3.5 All other rules outlined in this selection process for open competition vacancies also apply to candidates for reserved vacancies, except for those explicitly stated otherwise in this Notice.

4 SELECTION

4.1 The selection process will be conducted according to the following stages:

Stage 1 – Review of the documents submitted by the candidates, which will determine the approval or rejection of the registration.

Stage 2 – Evaluation of the dissertation/thesis proposal and the Lattes Curriculum, as follows:

a) The dissertation/thesis proposal draft will be evaluated based on the criteria outlined in ANNEX 1, and a proposal grade (**PG**) ranging from 0.0 (zero) to 10.0 (ten) will be assigned. Candidates who do not achieve the minimum score of 7.0 in this assessment will be automatically disqualified from the selection process.

b) The Lattes Curriculum will be evaluated based on the criteria established in ANNEX 2, covering the period from 2020 to 2024, and will include the following duly verified items: (i) professional performance in higher education; (ii) research and supervision activities (participation/coordination of projects and supervision of completed student projects); (iii) bibliographic production (articles published in indexed journals and/or accepted for publication, and books or book chapters published); and (iv) proficiency in English. There is no need to provide additional data from the Lattes Curriculum. The maximum score for the curriculum is 300 points for the Master's program and 500 points for the Doctoral program. Master's candidates who score 300 points or more and Doctoral candidates who score 500 points or more will receive the maximum grade of 10.0 (ten). The grades of Master's candidates who do not reach 300 points and Doctoral candidates who do not reach 500 points will be calculated proportionally to the maximum score (using a simple rule of three). Therefore, each candidate will be assigned a curriculum grade (**CG**) from 0.0 to 10.0 in this assessment;

c) At the discretion of the professors involved, changes may be made to the professors appointed to guide the research project.

Stage 3 – Interviews conducted by committees consisting of the professor nominated by the candidate on the application form and professors from the relevant research area, preferably. At this stage, candidates will be assessed based on the following criteria:

- a) Relevant details regarding the candidate's involvement in activities related to the program, within the area of concentration and research line, as assessed by each evaluation committee. The panel will issue a grade (panel grade - **PG**) ranging from 0.0 (zero) to 10.0 (ten). Candidates who do not achieve the minimum score of 7.0 in this assessment will be automatically disqualified from the selection process.
- b) Relevant aspects of the candidate's participation in research projects, laboratory work, dedication, and involvement with the program, according to criteria established by the professor and applicable to all candidates, will be scored by the intended supervisor (supervisor grade - **SG**) from 0.0 (zero) to 10.0 (ten). Candidates who do not achieve the minimum score of 7.0 (seven) in this assessment will be automatically disqualified from the selection process.

4.2 The selection will be conducted according to the following schedule:
